

# THE BLAIRMORE ENTERPRISE

VOL. XXIII, NO. 81.

THE BLAIRMORE ENTERPRISE, THURSDAY, AUGUST 4, 1932.

\$2.00 PER ANNUM

## Orpheum - 'Talkies' RE-OPENING

TONIGHT WITH  
NEW ERA IN ENTERTAINMENT  
Newly Decorated - Advanced Acoustical Treatment  
Latest Sound Equipment in Alberta

Thursday - Friday - Saturday  
See, Hear -- Maurice **Chevalier**

IN  
"THE SMILING LIEUTENANT"

with  
**Perfect Sound**

ALSO SELECTED SHORT FEATURETTES  
Watch for Next Week's Programmes

### HUNGARIAN ATMOSPHERE

FINELY REPRODUCED IN  
"TONIGHT OR NEVER"

Budapest, the capital of Hungary, famous Willy Pogany also a Hungarian, from sketches he had made, is the setting of "Tonight or Never," in which Gloria Swanson, an art-student, Its ancient palaces comes to the screen of Cole's theatre on Thursday, Friday and Saturday. Thrilling gypsy music which makes To make sure that its atmosphere was up so much of the charm of the old accurately reproduced, Samuel Goldwyn, producer of "Tonight or Never," ality which have earned Budapest the for United Artists, put the technical name of a second Paris, are re- details of the production entirely in duced in this romantic picture of, the hands of natives. Lili Hatvany, Hungarian opera-singer and her mys who wrote the original play, and Ee, terious American pursuer.

### PROVINCIAL TRACK MEET HERE NEXT WEDNESDAY

The provincial amateur track and field championship meet takes place in Blaimore on Wednesday next, under the auspices of the Blaimore Athletic Association and sanctioned by the Track and Field committee of the Alberta Branch of the Amateur Athletic Union of Canada.

We understand that a large number of entries from various parts of Alberta have been received and some keen competitions are assured for the day.

The programme will start promptly at 10:30 a.m.

His Worship Mayor Farmer has officially declared the day a public holiday.

The grounds at the athletic stadium have been thoroughly surfaced and levelled, and the quarter-mile track is in first class shape. To do this work afforded considerable relief work.

A special feature of the day will be the Jubilee five-mile marathon, open. For many years, this race has been run in conjunction with the July 1st sports, but on account of economic conditions, sports were not held on Dominion Day.

Following are the committees in charge: secretary, S. G. B. Mann, Blaimore; director-in-chief, W. H. Chappell, Jr., publicity committee, Robert Gray and S. G. B. Mann; grounds committee, J. A. Rodd, J. Rossi and N. Oliver; finance committee, R. W. H. Pichey (president), J. McDougall and J. Corbett; registration committee, P. C. Montalbert, chairman, and others.

Tags will be on sale for admission to grounds at: Adults 50c; Children, 12 to 19 years, 25c; under 12 free.

### ORPHEUM IMPROVES ENTERTAINMENT

A new era in talkie entertainment is in store for the patrons of the Orpheum theatre, with the grand re-opening tonight. Manager R. Ringold has gone to considerable expense in altering his equipment and premises to give local theatre goers the latest and best improvements on the market today.

For the last two weeks, the theatre has been closed and in the hands of experts for the alterations. New equipment has been installed by Mr. Clarence Dowdley, of Calgary, guaranteeing perfect sound and synchronization, with volume control, ample for a 2000-seat house, while he has personally supervised the new and advanced acoustical treatment that has been effected. The building has also been pleasingly redecorated by Mr. G. E. Janzer, of Lethbridge, and other improvements have been made to eliminate unneeded noise. Those who have heard and seen the trial screenings speak highly of the improvement.

Starting tonight, and for the balance of the week, with Maurice Chevalier in "The Smiling Lieutenant," the theatre will be operated continuously throughout the week in future.

### FORMER BLAIR- MOREITES MOURN

The many friends here of Mr. and Mrs. Herman D. Phillips will regret to learn of the death of their eldest daughter, Kathleen Batrie, which occurred on July 21st at Pasadena, California. Miss Phillips was eighteen years of age. Mr. Phillips was an old-time office employee of the West Canadian Collieries here.

### BLAIRMORE PUBLIC LIBRARY

Books being placed on the shelves this week are:

"Purple Springs," by N. L. McCune; "Mr. Barnes American," by Gunter; "The Usurper," by W. J. Locke; "Helen's Babies," by Habington; "The Curlytops and Their Playmates," by Garis; "Daddy's Girl," by Meade; "Huxley Prophet of Science," by Peterson; "The Golden Road in English Literature," by Amy Cruise. The library hours are Tuesdays and Thursdays from 7 to 9 p.m., and Saturdays from 7 to 10 p.m. The fee is \$1.00 per year for residents and \$2.00 per year for non-residents. We wish this week to thank Edith Oakes for a splendid donation of books to the library. "Thank you, Edith."

A large boiler and quantity of equipment, taken from the local cement plant, was shipped to the Canadian Cement Company at Calgary early this week. The boiler, weighing in the neighborhood of ten tons, was moved and loaded on a flat car at the depot by Sartoris & Bielli.

### FOREST FIRES ARE RAGING

As we go to press, a number of serious forest fires are raging. Two or three of them were believed to have been started by last Friday's lightning storm, one at the headwaters of the Elk, about forty miles north of Natal; another in the hills directly north-west of Hoerner, and the third in the beautiful Flathead country, some twenty miles south of Corbin. To worry the people of this district, fire appeared in the hills south of Coleman and just east of Star Creek during a high wind yesterday afternoon, and in a few hours had gained alarming proportions.

A large number of men were rushed to the scene and were replaced by a new gang this morning. A change of wind this morning has somewhat relieved anxiety here.

In British Columbia, we understand, no effort is being made on the part of the government to prevent fire or their spread, and all fire-fighting activities are undertaken by private citizens to protect their own holdings.

Victoria Day Parade at Blaimore, May 24th, 1932

## COLE'S THEATRE BELLEVUE

Friday and Saturday Aug. 5 and 6

GLORIA SWANSON

IN  
"TONIGHT OR NEVER"

The Glamorous Gloria Re-appears in a Brilliant Romantic Comedy. One of David Belasco's greatest stage successes. Marvelous settings - Venice, Budapest, The Danube, Grand Opera. Entertainment De Luxe.

Added Attraction - Comedy and Novelty Reel  
SAT. MATINEE 1.30 - TWO SHOWS AT NIGHT, 7.30 and 9.30 p.m.  
Admission - 35c and tax - 25c. tax included

Monday, Tuesday, Wed. - August 8, 9, 10  
Charles Bickford, Linda Randolph, Rose Hobart

IN  
"EAST of BORNEO"

Thirty thousand miles for atmosphere. Remarkable experiences in the Tropics. Two years in the Jungle to stage scenes never before Screened.

FIRST CHAPTER OF NEW SERIAL  
"DANGER ISLAND"  
with  
Kenneth Harlan and All Star Cast

Next Thursday, Friday and Saturday  
RAMON NOVARRO

IN  
"HUDDLE"

COMING Garbo in "Mati Hari" - "Sunshine Susie"  
COMING Ronald Colman in "Arrowsmith"

### UNVEILING PROGRAMME HEARD HERE

The addresses of His Royal Highness the Prince of Wales and President Albert Lebrun, of France, at the unveiling of the Somme Memorial at Thiepval, were broadcast throughout Canada August 1st. The broadcast, picked up by the B.C.C., was brought across the Atlantic over the Canadian trans-Atlantic telephone circuit through the co-operation of the Canadian Marconi Company, B.I. Telephone Company and the British Post Office.

A Calgary syndicate has taken a three months' option on the Hemlock mine at Perry Creek, B.C.

## SAFeway STORES

PRICES EFFECTIVE

WORLD HAPPENINGS  
BRIEFLY TOLD

The gas pressure in Turner Valley field is dropping quickly, tests show.

Rumors are current that negotiations for the release of Mahatma Gandhi are under way.

Foreign grown potatoes imported into Britain will be subjected to a duty of 41 a ton.

Sir Richard Threlfall, chemist and engineer, who rendered valuable services to the Allies during the World War, died at Edgworth, England.

The Prince of Wales said that he believed this year would witness the first move toward the world's return to better times.

At an Essex Girl Guides' rally at Thorndon Park, Brentwood, the princess royal presented a bronze medal to Eva Mitchell, aged 11, who rescued her baby sister from drowning.

When Mrs. M. Stansall, aged 102, recently made her first night at Mansfield, England, she insisted that her pilot, Sir Alan Cobham, the famous aviator, keep the loop.

The Chinese Government has placed a \$40,000 order with Marconi's Wireless Telegraph Company, Limited, for apparatus for a new beam wireless station, near Shanghai, capable of broadcasting also.

Quoting an 1833 statute which excluded the legal profession from arrest while going to and from court, S. L. August, Chicago attorney, was dismissed in court when charged with speeding 51 miles an hour.

Young Britons won't have to wrinkle brows any more learning the names of all the English kings. A thoughtful manufacturer has provided them with a pocket knife with the names engraved on the handle.

The telephone service between Great Britain and Egypt was inaugurated by a conversation between Mr. Baldwin, speaking in the Prime Minister's room in the House of Commons, and Sidky Pasha, Premier of Egypt.

## Some Memory Experts

Both Women and Men Have Done Remarkable Work

There was once a mathematical wizard, a young chap who was rather stupid in other respects, but could stand beside a railroad track while a long freight train was passing by, jot down in his brain the numbers of every box car, and after the train had passed recite the long list of five and six cipher numbers without one error. Memory experts have done some remarkable work in memorizing whole books, long legal instruments, and other literature. In the case of military spies it is often necessary for them to memorize secret orders so that they cannot be caught with written evidence on their persons. A Mme. Bessy Neumann has memorized the Old Testament and can recite it from beginning to end. She now is learning Shakespeare's plays by heart.

## Seeks New Adventure

Capt. John T. Randall, Skipper of the "Tm Alone," Goes North

A new phase of an adventurous career commenced recently when Captain John T. Randall, skipper of the run-runner "Tm Alone," sunk by the United States coastguard in 1920, left Edmonton for the Great Bear Lake radius fields. Captain Randall will be in charge of a boat used by a party investigating claims in the radius field.

## A New Apparatus

An electric apparatus has been invented that blows hot and cold. In the cooler seasons a hot current is shot from it by the use of a fan and a heater, but during the heated term the current is permitted to pass over a container filled with cracked ice or even ice water.

Button's first day—Musketeer, Viceroy.

W. N. U. 1053

## Contract Bridge

By Hamilton B. Hatch, Canadian Club, Toronto

## Defensive Tactics

In my previous article a general outline was given of the high card and distributional strength necessary for the overhauling hand to hold when making a defensive overcall. It was shown that, when vulnerable, the overcaller must have a stronger hand both in high cards, and in taking tricks in the suit bid, than when not vulnerable. Also that, when a bid of two is necessary to overcall, the hand overcalling, is good, but considerably stronger especially when vulnerable. What I will try to show today is how far it is good bridge to carry defensive bidding.

This must be answered by an analysis of the invisible side of the score sheet. Average contract rubber may be said to average one thousand points profit to the winners. This one thousand points for the purpose of this analysis, is divided into four hundred points and six hundred points. The four hundred points represents the concealed or invisible value of the first game of the rubber. The six hundred points represents the concealed or invisible value of the final game of the rubber. If then, a first game of a rubber is worth four hundred points, it follows that defense which stops a sure first game at a cost of four hundred points, is good. Notwithstanding the hard fact, that the defense partnership has against them in the honor column a definite four hundred points. Still if the incurring of this four hundred point penalty stopped game by the adversaries, the defense players have really broken even. If, however, after the deal is completed and the four hundred point penalty has been incurred, it is found that the opponents could not have made game, then the penalty incurred is a total loss, to the penalty incurring. It follows then, that defense bidding must be predicated on two basic factors:

First. It is certain that the opponents can make their contract. If it is not certain, then as a rule, it is best, rather than overbid and take a penalty, to allow the opponents to play the hand with the chance of defeating them. If it is certain that the opponents can make their contract, then the defender must know how large a penalty he is going to incur, and that knowledge constitutes the second basic factor.

It is necessary for the overbidding side to closely approximate, through their knowledge of their combined holdings, together with a knowledge of the combined holdings of the adversaries, the number of tricks they will take when playing the defensive contract. It is assumed in this discussion that the defender's contract has been doubled.

The following table shows the penalties which are allowable to defenders in order to save game.

To save first game the defenders may be set three tricks doubled. If the contract is set less than three tricks, the defenders show a profit. If set more than three tricks the defenders show a loss.

To save second game, when the defenders are not vulnerable, a set of four tricks doubled may be taken. If the set is less than four tricks, the defenders show a profit, if more than four tricks a loss.

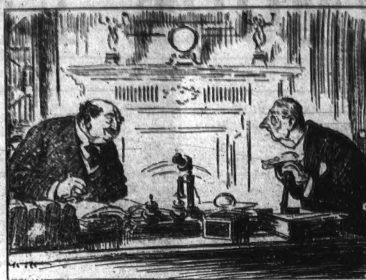

To save rubber game a set of two tricks doubled may be taken. If less than two tricks the defenders show a profit, if more than two tricks a loss.

Defense Against Partial Scores

About one game in four on the average is made by a side having a partial score. It follows then that a partial score is worth one quarter of the game score premium, plus the partial score itself. This gives an invaluable value to any partial score of between one hundred and fifty and two hundred points. The factor of safety in defense overbidding to save partial scores is very small and it takes very close figuring by the defenders to successfully defend against partial score contracts. As a rule the most expert bridge player is in difficulties, when trying to figure whether he is going to be set two or three tricks. If to save partial score he is set three tricks doubled his loss is a set of two tricks doubled. If he is set two tricks doubled he has broken even, and if he is set one trick doubled he has made a profit.

To sum up then, defensive overbidding is a very important factor in contract, but its use must be predicated on precise card valuation methods, and also an ability by the player to estimate closely the losing tricks in the combined hands, if the contract is played in the overbid.

Science has figured that the earth travels 584,600,000 miles on its annual trip around the sun, and that more than 1,601,600 miles are travelled by the globe every day.

MONEY-LENDER: "Well, my friend, you have a very rich fiancée have you not?"

CLIENT: "No. You see, I broke off the engagement when a handwriting expert gave me an unfavorable report of her character."

MONEY-LENDER: "Oh, I like it."

CLIENT: "Yes, and the handwriting expert married her."—The Humorist, London, England.

650

AMAZINGLY ATTRACTIVE IS THIS LOVELY DRESS

Suitable for normal or larger figures.

Here's a nice day dress, so full of charm and modishness, as is the built-up waistline and softly draped neck, so becoming and liked. The skirt is slenderizing too with bias hip seaming and length giving panel at the front and at the back.

Dark blue and white crepe silk print with plain white is stunning as the original.

A black and white striped cotton voile is very effective, as are polka-dotted batiste prints and white tub silk.

Style No. 650 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust. Size 36 requires 2 1/4 yards 39-inch printed material, with 1 1/4 yards 39-inch plain material.

Price of pattern 25 cents in stamps or coin (coin preferred.) Wrap coin carefully.

## Bird Fooled Them

Hundreds of people in England tried to entice a stork from its perch on a Grimwood roof recently. The stork, strange of food and speculating on the strange fact that it could remain motionless on one leg for so long. Then A. Sutcliffe, bird collector, and owner of a private zoo, came along. "The bird is a stork," he said.

"I have always maintained," declared Charles, "that no two people on earth think alike."

"You'll change your mind," said his fiancée, "when you look over our wedding presents."

## Recipes For This Week

(By Betty Barclay)

## RHUBARB JUICE

Rhubarb juice is particularly valuable for fruit beverages, and for combining with other fruit juices to lend tartness to jellies. It is also good for jellied desserts and pudding sauces. It may be prepared from the stalks that have become too tough to cook in other ways.

Cut the rhubarb in small pieces, add just enough water to cover and simmer until very soft. Strain the juice through a jelly bag. To each quart of juice add two cups sugar. Heat until the sugar is dissolved. Skim. Bring to the boiling point. Seal in clean, hot jars or bottles.

## CREOLE CUSTARD

3 cups hot milk.  
1/2 cup sugar.  
2 eggs.  
1/2 cup cold coffee.  
Pinch of salt.

Scald milk in double boiler. Beat egg and add sugar and salt. Pour hot milk in egg mixture, stirring well. Put the mixture into double boiler and cook, stirring until it thickens like cream. Strain the custard into a dish to cool, then add coffee and chill.

## Memorial For Adventurers

Danes and Norwegians Plan To Erect Cairn At Church

Danes and Norwegians of the Lutheran faith, are planning to erect a memorial cairn at Churchhill to the memory of Captain Jens Munck and his party of 66 adventurers who founded "Winterhaven," on the shores of Hudson Bay in 1619. Announcement was made to this effect at Winnipeg, recently by Rev. H. M. Herremann of Pine Creek, Minn.

Munck was sent out by King Christian the Fourth of Denmark and Norway in 1619. With the party was Chaplain Rasmus Jensen Aarhus, first Lutheran pastor to set foot in America. Along with 60 of the party, the pastor died of disease during the terrible winter of 1620, leaving Captain Munck and two men the survivors of the ill-fated expedition.

## Hurried Preparation

Chairman Thought Quickly When Introducing Famous English Novel

Sir Hall Caine was the guest of honor one day at a literary dinner, and it fell to Thomas Nelson Page, the American novelist, to introduce him.

Just before rising to do so, Page passed his menu card to Caine with a request that he autograph it. "After you have spoken," whispered Sir Hall.

"No, no—do it now," said Page.

Caine obeyed, and later he asked his introducer why he had been in so great a hurry to obtain his signature.

"Well," said Page, "if you must know, it was because I wanted to be able to say truthfully that I had read something you had written."

## Abbreviated Ancestor

For easy acceptance of things a trifle unusual it is hard to beat the small boy looking at the bust of his late grandfather—the bust mounted on a little circular stand. Having asked his introducer why he had been in so great a hurry to obtain his signature.

"Well," said Page, "if you must know, it was because I wanted to be able to say truthfully that I had read something you had written."

"And was that all there was of grandpa?"

Defendant (in loud voice): "Justice, justice. I demand justice."

Judge (rapping for order): "The defendant will please remember he is in a courtroom."

SUNDAY SCHOOL LESSON  
AUGUST 7

## THE TEN COMMANDMENTS

Golden Text: "Thou shalt love Jehovah thy God with all thy heart, and with all thy soul, and with all thy might."—Deuteronomy 6:5.

Lesson: Exodus 19:1 to 20:11.

Devotional Reading: Psalm 107:1-4.

## Explanations and Comments

The First Commandment: Worship God Exclusively, Verse 3.—When these laws were promulgated from Sinai the world was given over to the worship of many gods, and the words, "Thou shalt have no other gods before Me," mean "In addition to Me." The first commandment implies God's unity. It forbids idolatry, the worship of false gods.

"What a man loves, that is his god, Luther reminds us, and justifies this declaration by adding that what he loves he carries in his heart, goes about with it night and day, sleeps and wakes with it, so that it may be wealth or pain, pleasure or renown.

There are a great many things which God will put up with in a human being," says Ruskin: "There is one thing He will not put up with—a second place." We cannot serve God and mammon.

The Second Commandment: Worship God Spiritually, verses 4-6. The second commandment forbids image worship, the making of an object of worship of any graven image or likeness of anything that is in heaven above, or that is in the earth beneath, or that is in the water under the earth. The earth was thought of as a flat expanse upon which the waters of water. God is Spirit; He, the true God, must not be worshipped under false forms.

"For I, Jehovah thy God, am a jealous God," jealous of My honor, of the use of images which turn the worshiper's mind away from Me while they represent Me.

There is a danger that a crucifix, like a symbol, may come to be regarded as a charm, a divine talisman, and insensibly become so important in a worshiper's mind as to hide from him the One it symbolizes.

"Visiting the iniquity of the fathers upon the children, upon the third and fourth generation of them that hate me." A young man who asked a college professor why the text did not read that the sins of the fathers were visited upon the children to the seventh and eighth generations as well as to the third and fourth, received this answer: "Because there will be no seventh or eighth generations. Sin extinguishes itself before it can be passed on."

"This edict is supported by a great physical law which proves that nature is the friend of righteous living and the foe of its opposite. Vice shortens life, weakens posterity and pollutes its blood. Virtue lengthens life and invigorates posterity, insuring its bodily health and intellectual strength. The children of the wicked may repudiate their parents' heritage or the children of the good forsake the ways of their fathers. Here a conflict of principles arises. The law of heredity is offset by the law of free choice."—S. Parks Cadman.

The Fourth Commandment: Remember God's Day, verses 8-11.—The seventh day is to be distinguished from other days by abstinence from labor and invigilation, insuring its bodily health and intellectual strength. The children of the wicked may repudiate their parents' heritage or the children of the good forsake the ways of their fathers. Here a conflict of principles arises. The law of heredity is offset by the law of free choice."—S. Parks Cadman.

## Where Silence Rules

No Word Is Ever Spoken In German Monastery

In the broad orchards of the monastery of Marwald, in the Elbe, Germany, the only sounds are the sighing of the winds in the trees and the songs of the birds. The monks who prune the trees and pluck the fruit of the orchards are silent. Their is the strictest Catholic order of penitence in the world. From about to lay brother these monks work for a living, always in complete silence. Their food is simple, and their monastic garb may be changed only every eight days. All of the inmates of the monastery sleep together on plain boards in one room.

## Michigan Shop Sells Bait

Lake fishermen at Pontiac, Michigan, may obtain bait from "Ye Olde Worm Shoppe," a stand located near one of Oakland county's most popular fishing resorts. "Clerks" at the "Shoppe" sell worms at six dozen for 25 cents.

## Works In a Circle

Two flocks of sheep having been placed on the Berlin Central aerodrome at Berlin, Germany, to keep down the grass, sheep dogs and shepherds have been employed to keep the sheep out of the path of planes.

Gus: I'll have you understand there's good blood in my family.

Gulliver: Yes, and how much did they pay for the transfusion?

Home economics specialists point out that washing fine china with too hot water increased the possibility of its chipping.

It would require 10 centuries to spend one billion dollars at the rate of one dollar a minute.

Canada Exporting  
Less Wool

Manufacturers Are Using More Of Home Grown Product

"Three times as much Canadian-produced wool was bought last year by the Canadian industry as was exported," said Mack Douglas Halliday, Secretary of the Canadian Woolen and Knit Goods Manufacturers Association, speaking in Toronto. The use of Canadian wool is steadily increasing, due to improved merchandising methods adopted by sellers, the 30% increase in yields of woolen cloth woven in Canada, and the duty placed on Argentine wool.

"In a report issued through the National Research Foundation the methods by which Canadian wool gets to market are outlined. Abattoirs buy live lambs and sheep, the wool is marketed as pulled wool, and 80% of such wool is bought by Canadian manufacturers. Seventy woolen and knitting mills bought wool direct from farmers. One hundred and eight firms listed as wool dealers or cooperative associations handled Canadian wool re-sale. Approximately five million lbs. of the clip was used in home industries.

## This Bargar Alarm Works

Sounds Siren, Explodes a Bomb and Imprints Thief

The smash-and-grab jewel thief, who has infested England for the past few months, has met his equal in science.

Neither the vigilance of the police, nor the precautions of jewellers have succeeded in diminishing the number of these brazen robberies. But it will take the best criminal brains in the world to outwit the Bargar alarm, a new precautionary invention.

A demonstration of the invention was given before jewellers at South-end-on-Sea. A jeweller turned himself into a robber for the purpose of the demonstration.

A hole large enough for a man to pass was made in a jewelry shop by smashing it in with a blackjack. Then a number of melodramatic things happened.

First a deafening siren went off which could be heard for three-quarters of a mile around. A gas bomb exploded, followed by a smoke bomb which cast a screen about the jewels and undid the raid.

As though this were not enough a secret steel panel snapped across the window, imprisoning the raider and protecting the jewels.

Brain Controls Fast  
Or Slow Reading

Average Speed Is Around Six Words Per Second

Six words per second, or about four and one-half hours for a standard size book is good average reading speed, and most people can aspire to reach this seemingly extraordinary rapidity. It is the brain, not the eye, which determines the speed of reading. The eye cannot move steadily, but must move in a series of jerks, with pauses between. These pauses are needed to see the printed page clearly, but still more to give time for the meaning to be grasped.

## Visits Largest Active Crater

Glacier Priest Returns From Thrilling Adventures In North

After conquering Aniakchak, largest active crater in the world with a circumference of 21 miles and a drop of 3,000 feet from rim to floor, by air and foot, Rev. Father Bernard R. Hubbard, Glacier priest of Santa Clara University, has returned from the north and is resting at Victoria after five months of scientific exploration, packed with thrills and incidents. With him he has brought an official record of the highest crater bed temperatures known to man.

Four women and two men, who started from Melbourne, Australia, by automobile six months ago, have arrived at Dover, England, after having motored 12,000 miles of their tour overland.

"I can't agree you. I haven't enough work for the men I have."

"That does not matter. Very little work would keep me going."—Vart Hen, Stockholm.

## THE HOUSE OF DREAMS-COME-TRUE

BY  
MARGARET FIDLES  
Author of  
"The Splendid Folly," "The Hermit of the Moor,"  
Hodder & Broughton, Ltd., London.

CHAPTER XXVII.—Continued.

But she had courage enough to face the consequences of that refusal, to stand up to the clatter of poisonous tongues that must ensue, and trust enough to bank on the loyalty of her real friends, knowing it would be the same splendid loyalty that she herself would have given to any one of them in like circumstances. For Jean was a woman who was more than mere lip-service from those who called themselves her friends.

Burke had never been more mistaken in his calculations than when he counted upon forcing her hand by the mere fear of scandal. But none the less he held her—and held her in the meshes of a far stronger and more binding net, had he but realized it.

Looking back upon the episode from which her present predicament had actually sprung, Jean could almost have found in her heart to smile at the relative importance which, at the time, that same incident had assumed in her eyes.

It had seemed to her, then, that for Blaise ever to hear that she had been locked in a room with Burke, had spent an uncounted hour or so with him at the "honeymooners' inn" would be the uttermost calamity that could befall her.

How would never believe that it had been by no will of hers—so she had thought at the time—and that force lover's jealousy which had been the origin of their quarrel, and of all the subsequent mutual misunderstandings and slanders; would be resented to fresh life, and his distrust of her become something infinitely more difficult to combat.

But compared with the present situation which confronted her, the happenings of that past day faded into insignificance. She stood, now, face to face with a choice such as surely few women had been forced to make.

Whichever way she decided, which ever of the two alternatives she accepted, her happiness must pay the price. Nothing she could ever say or do, afterwards, would set her right in the eyes of the man whose belief in her meant everything. Whether she agreed to marry Burke, returning home in the odour of sanctity within the next hour or two, or whether she refused and returned the next morning—free but with the incontrovertible fact of a night spent at Burke's bungalow, alone with him, behind her, Blaise would never trust or believe in her love for him again.

And if she promised to marry Burke and so save her reputation, it must automatically mean the end of everything between herself and the man she loved—the dropping of an iron curtain compared with which the wall built up out of their frequent misunderstandings in the past seemed something as trifling and as easily demolished as a card house.

On the other hand, if she risked her good name and kept her freedom, she would be equally as cut off from him. Not that she feared that Blaise would take the kindest view of the affair—she was sure that he believed in her enough not to misjudge her as the world might do—but he would inevitably think that she had deliberately chosen to spend an afternoon on the Moore alone with Burke—playing with fire—exactly as he had warned her not to, and getting her fingers

burnt in consequence—and he would accept it as a sheer denial of the slight pledge of love understood which bound them together.

He would never trust her again—nor forgive her. No man could. Love's loyalty, rocked by the swift currents of jealousy and passion, is not of the same quality as the steady loyalty of friendship—that calm, unshakable confidence which may exist between man and man or woman and woman.

Moreover—and here alone was where the fear of gossip troubled her—even if the inconceivable happened and Blaise forgave and trusted her again, she could not go to him with a sturred name, give him herself—when the gift was outwardly tarnished. The Tormarin pride was unyielding as a rock—and Tormarin women had always been above suspicion. She could not break the tradition of an old name—do that disservice to the man she loved! No, if she could find no way out of the web in which she had been caught she was set as far apart from Blaise as though they had never met. Only the agony of meeting and remembrance would be with her for the rest of life!

Jean envisaged very clearly the possibilities that lay ahead—when she faced them with a breathless, torturing perception of their imminence. It was to be a fight—here and now—for the whole happiness of life might hold.

She turned to Burke breaking at last the long silence which had descended upon them.

"And what do you suppose I feel towards you, Geoffrey? Will you be content to have your wife think of you—as I must think?"

A faint shadow flitted across his face. The quiet scorn of her words—their underlying significance—flicked him on the cheek.

"I'll be content to have you as my wife—at any price," he said stubbornly. "Jean"—a sudden urgency in his tones—"try to believe I hate all this as much as you do. When you're my wife, I'll spend my life in teaching you to forget it—in wiping the very memory of today out of your mind."

"I shall never forget it," she said slowly. Then bitterly: "I wonder why you even offer me a choice—when you know that it is really no choice."

"Why? Because I swore to you that you should give me what I want—that I wouldn't take even a kiss from you again by force. But"—unevenly—"I didn't know what it meant—letting a woman kiss me."

Outside, the mist had thickened into fog, curtaining the windows. The light had dimmed to a queer, glimmering dusk, changing the values of things, and out of the shifting shadows her white face, with its scarlet lines of scornful mouth, gleamed at him—elusive, tantalising as a flower that waxes out of reach. In the uncertain half-light which struggled in through the dulled window-panes there was something provocative, maddening—a kind of etherealised lure of the senses, in the wavering, shadowed loveliness of her. The man's pulses leaped; something within him slipped its leash.

"Kiss me!" he demanded hoarsely. "Don't keep me waiting any longer. Give me your lips . . . now . . . now . . ."

She sprang aside from him, warding him off. Her eyes stormed at him out of her white face.

"You promised!" she cried, her voice sharp with fear. "You promised!"

The tension of the next moment strained her nerves to breaking-point. Then he fell back. Slowly his arms dropped to his sides without touching her, his hands clenching with the effort that it cost him.

"You're right," he said, breathing quickly. "I promised. I'll keep my promise." Then, vehemently: "Jean, why won't you let me take you home? I could put the car right in ten minutes. Come home!"

There was unmistakable appeal in his tones. It was obvious he hated the task to which he had set himself, although he had no intention of yielding.

She stared at him doubtfully. "Will you? Will you take me home, Geoffrey?" by this hour of the day—"is this only another trap?"

"I'll take you home—at once—if you'll promise to be my wife. Jean, it's better than waiting till tomorrow—till circumstances force you into it!" he urged.

He spoke with a new gaiety, as though he felt very sure of her ultimate decision and glad that the strain of the struggle of opposing wills was past.

"Chape! How heavenly! I'm afraid!"—apologetically—"It's very unromantic of me, Geoffrey?"

He laughed and, striking a match, lit the lamp.

"Disagreeably so! But there are moments for romance and moments for chaps. And this is distinctly the no-

be quite justified in the circumstances."

He smiled a little and shook his head.

"No," he said quietly. "I'm not afraid of that. If you give me your word, I know you'll keep it. You wouldn't be—you—if you could do otherwise."

For a moment Jean was tempted. Her mind seemed to take his meaning, to believe in her and use it to extricate herself from the position into which he had thrust her. As she herself had said, the circumstances were such as almost to justify her. Yet something within her, something that was an integral part of her whole nature, rebelled against the idea of giving a promise which, from the moment that she made it, she would have no smallest intention of keeping. It would be like the breaking of a prisoner's given parole—equally mean and dishonourable.

With a little mental struggle she dismissed the idea and the brief temptation. She must find some other way, some other road to safety. If only he would leave her alone, leave her just long enough for her to make a dash for it—out of his house into the wide wilderness of mist-wrapped moor!

It would be a virtually hopeless task to find her way to any village or to the farmstead, three miles away, of which Burke had spoken. She knew that, even moon-wise folk, could not find their way in the dark, and she was quite sure that she would be lost. She must surrender, probably liking you in secret all the better for having mastered them.

He had forgotten that he was dealing with a daughter of Jacqueline Mavor. All the actress that was Jean's mother came out in her now, called up from some hidden fold of inherited knowledge, to meet the imperative need of the moment.

If you "roll your own," use Ogden's fine cut cigarette tobacco

## A Remarkable Lake In Saskatchewan

**Curative Properties Of Waters Of Montana Lake Are Widely Known**  
About sixty miles east of Saskatoon, Saskatchewan, is the town of Watrous, a divisional point on the railway—where Mountain—time—replacing Central Time—comes into effect. A short distance to the north of Watrous is Little Manitou Lake, fourteen miles long by one and a half miles wide, and generally recognized as being one of the most remarkable mineralized bodies of water in the world. The curative properties of its waters for rheumatism and diseases of the skin are undoubtedly great, the proof being seen in the beneficial results obtained every summer by visitors to the lake. A comparative analysis of the waters of this lake with those of the famous Carlsbad of Germany, showed the former to be even richer in saline and other medicinal qualities than the latter.

Not only are the waters rich in medicinal qualities, they also afford excellent bathing, and being six times more buoyant than the waters of the ocean, bathers may lie on their surface leisurely—and read or smoke if they so desire. The sand on the shore possesses the same curative properties as its waters, hence the vogue of sand baths.

## Long Wait In Store

**Car Owner Thought "Self-Starter" Motor Just That**  
Mr. Smith had inherited a large sum of money. The first thing he bought with new wealth was a motor car.

After a few driving seasons on his garage proprietor's car he thought he would try his hand at driving his own new car.

All went well for a time. Presently, while trying to change down into second gear, he stalled his engine and the car came to a standstill.

Smith, however, just leaned back in his seat and made no attempt to restart it.

A policeman who had seen the car come to a standstill approached Smith.

"Can I assist you at all, sir?" he asked.

Smith shook his head.

"No, thank you, officer," he replied. "It is quite all right. You see, this is one of those self-starting cars."

## Results Are Miraculous

**When Business Of Timber Growing Is Aided By Science**

When scientific brains are applied to the business of growing timber, the result appears miraculous. Dr. J. H. White of the faculty of forestry, Toronto, reports that sections of Switzerland, under expert forest management are producing a mighty annual crop of timber as to be as self-sustaining Ontario's pulp and paper industry in perpetuity on the growth of just 100 townships. At present Ontario owns the equivalent of 5,000 townships of timber, and the possibilities of production under an intensive program are almost incalculable all over Canada.—Brandon Sun.

## Rural and Urban Residents

Of the population of Canada 46.3 per cent. are rural dwellers and 53.7 per cent. reside in urban centres. Ten years ago the proportions were 50.5 per cent. rural and 49.5 per cent. urban. The largest proportion of rural population is found in Prince Edward Island, where the country residents represent 76.8 per cent.

The total length of public road in Great Britain is 17,256 miles. For every square mile of country there are, on the average, two miles of highway.

## Little Helps For This Week

"Let us love one another, for love is of God; and every one that loveth is born of God, and knoweth God."—1 John iv. 7.

Our God is Love, and that which was made, Evil in this good world that He has made, is meant to be a little, tender shade between us and His glory—that is all. And He who loves the best his fellow-man.

Is loving God the holiest way he can.

—Alice Cary.

The desire to be beloved is ever restless and unsatisfied; but the love that flows out upon others is a perpetual well-spring from on high.

—Lydia M. Child.

Love is God's loaf; and 'tis that feeding for which we are taught to pray.—Henry Ward Beecher.

## Lake Rates On Grain

Said To Be The Lowest Now Since 1915

Grain rates by water from the head of the lakes to Montreal, have been stabilized at 4½ cents per bushel through the establishment of the Association Lake Freighters, Limited, in which all the Canadian lake steamship companies are associated. Incorporation of the company was announced in the Canada Gazette at Ottawa.

The rate of 4½ cents is the lowest since 1915 when 4 cents per bushel was paid. A peak of 11.64 was reached in 1920, a gradual decrease having taken place since then.

Shippers declare that the present rate is not sufficient to enable them to defray the cost of insurance and meet overhead expenses and several owners are understood not to be carrying full insurance coverage on their vessels.

## Market For Potatoes

**Britain's Import Duty Against Foreign Potatoes May Benefit**

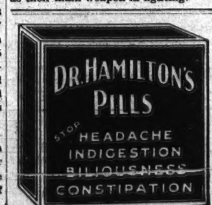

Placing of an import duty against foreign potatoes by Great Britain will prove "a fine thing for the Dominion," said S. K. Henry, member of a Toronto wholesale potato firm.

"For some years past there has been an embargo against our potatoes entering the British market. Eastern Canada and particularly the people of the maritimes, have tried in vain to have the restrictions lifted. In the meantime German, French and Dutch potatoes have been moving into the United Kingdom market. England, particularly, has been paying attractive figures for those potatoes," said Mr. Henry.

## The Eleven-Year Sunspot Cycle

Sunspots vary in number in an irregular "cycle." The last minimum occurred in 1923 followed by a maximum in 1928. In recent months sunspots have been so scarce that the next minimum will probably arrive a year or more earlier than 1934-7, when the average duration of the cycle a minimum might be expected.

The Egyptians were among the world's great archers, using the bow as their main weapon in fighting.

Blairmore, Alta., Thurs., Aug. 4, 1932

## POWER OF ADVERTISING

Advertising is one of the indispensable tools to be used in the reconstruction of North American industry, was the keynote of an address to the convention of the Pacific Advertising Clubs Association, at Vancouver, by George W. Kleiser, of San Francisco.

"Advertising," he declared, "is a powerful instrument which should be used with the greatest skill and care in order that the rebuilding may be sound and lasting once the upturn has begun."

"With the change in the situation from one where anything could be sold that could be manufactured, to one where anything can be manufactured that can be sold—the opportunity exists for a genuine demonstration of the results that can be obtained through powerful advertising, intelligently done."

"This," he said, "should be done on behalf of meritorious products directed to a timid and doubting public through the primary media serving them."

The confidence of the advertiser and public, which to a greater or lesser degree has been shaken by extreme methods in advertising during these unusual times, must be restored. This can be accomplished only through honesty, truth and straightforwardness in advertising itself," he said. "Advertising will, no doubt, lead us out of the depression and probably will be one of the first industries to recover."

W. J. BARTLETT

HISTORY OF DEPRESSIONS  
IN PAST TOLD IN BRIEF

You must always have something with which to draw a comparison. Therefore when we wonder how long present depression will continue, we turn to the past to see how long former spells of hard times lasted. In the last hundred years, we are told, there have been thirteen major depressions and six or seven minor ones:

Depression in 1859 lasting 12 months.  
Depression in 1869 lasting 8 months.  
Depression in 1873 lasting 30 months.  
Depression in 1884 lasting 29 months.  
Depression in 1887 lasting 10 months.  
Depression in 1893 lasting 25 months.  
Depression in 1903 lasting 25 months.  
Depression in 1907 lasting 12 months.  
Depression in 1914 lasting 8 months.  
Depression in 1921 lasting 14 months.

Now, the notable feature about these panics is that everyone of them has been followed by flush times, and the longer the depression lasted the longer and more active was the reign of prosperity that followed.

## NINETY-FIVE YEARS AGO

"Trade is stagnant. Stocks are lower than ever. Real estate is unsaleable. Rents have fallen and are not being paid. Taxes have increased ruinously. The pressure is severe. God help the property owner."

This is an extract from a speech made in 1837—nearly one hundred years ago. And two years following, John Jacob Astor, already a heavy owner of real estate, doubled and trebled his investments, laying the foundation for one of the greatest fortunes in America.

He was an optimist who got rich buying when pessimists pessimized.

At Monday night's Red meeting, the miners were advised to maintain their strike stand, that sufficient food-stuff was in sight to keep them for another six months. But that doesn't pay store bills!

The new school building at Blairmore is about completed.

Snobbish is the pride of those who are not sure of their position.

Mr. and Mrs. B. W. Barrett and children returned Monday morning from France.

Mrs. Harold T. M. was up from Lethbridge last week end, on a visit to Blairmore friends.

Mrs. A. J. Kelly and children have been enjoying a holiday at Pincher Creek and Waterton Lakes.

Mr. Duncan, manager of the Michel hotel, is enjoying a holiday visit to Calgary.

Between 15,000 and 18,000 Boy Scouts are camping this summer in various parts of the Dominion.

An exchange carries the heading: "Bob Edwards Gets a Blow." Probably from a piece of charred wood.

Percy Williams was defeated in the semi-finals of the Olympic games at Los Angeles by a colored boy, Eddie Tolan.

Misses Madeleine Chardon and Sarah McVey left yesterday by motor on a vacation trip to Glacier Park and other U. S. Points.

Mr. and Mrs. Jack Davis and sons left the early part of the week for Bellingham, Washington, where they hope to reside in future.

Mrs. S. G. Bannan and Bobby and Shirley returned last week end from a holiday visit with friends at Lethbridge.

The stork visited the home of Mr. and Mrs. Ed. Womersley—on July the 23rd—leaving thereat a baby boy. Congratulations.

Mrs. S. McKay, accompanied by her son Tom and granddaughter, Betty Simister, returned from Edmonton on Saturday, where they spent their vacation. They were also accompanied by Mrs. Jessie Hood, who will reside there in future with her son George.

Some much needed improvements and repairs have been effected at the central school building during the holiday period, including re-flooring of a couple of rooms and the erection of a 13 x 15 canopy over the front entrance, now nearing completion.

The latest news: An imported speaker announced to an open air audience here on Monday evening that he "had been overseas during the war—and actually saw a man shot dead." This was about the best news this speaker had to impart, and he was cheered for that.

W. A. Vaughn, local district drummer for the Western Canada Wholesale Co., has turned in his Nash sedan, and now sports a new Chev. coupe, purchased through the Crown's Nest Pass Motors. The Nash has been purchased by Klyns brothers, of Hillcrest.

A nineteen-year-old lad named Billy McGillivray was at Vancouver subjected to an almost miracle operation when two ribs were removed, his heart laid bare and the casing sewed up. While running down the street with an open jackknife in his hand, he tripped and fell, the knife blade entering the casing of his heart. It was necessary to sew between heart beats.

Manager Montalbetti demonstrates to his "V.S.'s" that "it can be done."

BLAIRMORE UNITED CHURCH

"Serve the Church that the Church May Serve You."

Services for Sunday next:  
10 a.m.—JUNIOR SCHOOL.  
11 a.m.—SENIOR SCHOOL and PUBLIC WORSHIP.

No evening service during the months of July and August.

## ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, B.A., Rector

Services Sunday next, August 21st:  
Holy Communion at 11 a.m.

## WHAT IS THE MATTER WITH US?

Too many cats and too much wheat.  
Too much corn and too much meat.  
Too much cotton, too much oil.  
Too many hours that we don't toll.  
Too many highways, too many cars.  
Too many men behind the bars.

Too much poverty, too much wealth.  
Too many people have poor health.  
Too many wearing high heeled shoes.  
Too much politics, too much hoop.  
Too many loafing, too many high hats.

Too many failing to pay their debts.  
Too many spending dough for eggs.  
Too many talking of Europe's sag.  
Too many buying beyond their means.  
Too many buying pork and beans.  
Too many sowing a crop of wild oats.  
Too many candidates after our votes.  
Too many hiring their washing done.  
Too many playing at bridge for fun.

Too many looking to Canada.  
Too many people don't give a darn.  
Too many poets, too much prose.  
Too many girls without underclothes.  
Too much buying of goods on time.  
Too many people don't save a dime.  
Too much ball, too much play.  
Too many officers on big pay.  
Too many taxes, too much spent.  
Too many folks spend every cent.  
Too much fun, too much ease.  
Too many rips in our B.V.D.'s.

## OBSERVE THE HEN

Did you ever stop to think that hard times mean nothing to a hen? She just keeps on digging worms and laying eggs, regardless of what is said about conditions. If the ground is hard, she scratches the harder. If it's dry, she digs deeper. If she strikes a rock, she works around it. But always she digs up worms and turns them into hard-shelled profits as well as tender broilers. Did you ever see a pessimistic hen? Did you ever know of one starving to death waiting for worms to dig themselves to the surface? Did you ever hear one cackle because times were hard? Not on your life. She saves her breath for digging and her cackles for eggs.—EX.

A deaf and dumb resident of Barons is camped on the upper waters of Mill Creek, where he is busy painting some of the beautiful scenery.

Why is it that the man who informs you how international debt can be paid is the same fellow who owes you seven dollars?

Carl Axelsson recently returned to Canada from a six weeks sojourn to Soviet Russia, and when questioned at a meeting being addressed by him at Redcliff, he found that he was unable to answer authoritatively the various queries. At the conclusion of his talk on the rosy conditions prevailing in Russia and the time approaching when Canadians would realize that the bolsheviks were their best friends, he was asked why he did not stay in Russia since it was so much to his liking. There are scores of men and women right here to whom that same suggestion might well be made.

## CORRESPONDENCE

Hillcrest, Alta., July 30, 1932.

Dear Sir—May one who is vitally interested in Hillcrest school affairs reply in same part to the letter appearing in your paper of last week signed "A Ratepayer?"

In garbled statements contained therein hear a more or less clean resemblance to the truth in some instances, but the letter in its entirety is merely a report of the unofficial (but, none the less, very accurate) comments of a group of ladies at the meeting in question, most of whom for various reasons were personally interested in one or other of the local applicants.

The school board in the opinion of all disinterested and reflective ratepayers, did its duty without fear or favor, appointing those teachers who, in its opinion, would give most satisfaction to the ratepayers as a whole, and whose qualifications for teaching the various grades for which they were appointed were the best among the numerous applications received. For "A Ratepayer's" information, the school is "run" by a Board of Trustees, three in number, who elect chairman from among themselves at the first board meeting each year. Among other duties, this chairman is supposed to act as an official spokesman for the Board of Trustees at such public meetings as the one now referred to.

For the information of other interested ratepayers, can "A Ratepayer" inform us through these columns why, at the last annual meeting, her husband voted AGAINST any proposed reductions in the salaries of teachers or other employees of the Board. In view of her remarks in this connection I can only sign myself—

PUZZLED.

Hillcrest, Alta., July 31, 1932.

Dear Sir—I read the letter in your paper about the Hillcrest school meeting and would ask you to print the following:

First of all, I am surprised that you should give so much valuable space in your paper to print a lot of twaddle like that, which is all it amounts to.

Does "Ratepayer" think he pays all the taxes in Hillcrest, that he can make nasty insinuations against people who are putting in a lot of time and work running the school and getting nothing for it. The trustees are all old-timers in Hillcrest and every one trusts and respects them and knows they are reliable and that school affairs are safe in their hands, though of course, they may make mistakes like anyone else. What the trouble Ratepayer is talking about? Simply just because the trustees did not do just exactly as he thinks they should seem to be the whole trouble. It looks as if the person who wrote that letter wants the trustees to run the school and would like to be the whole school board, secretary, treasurer, principal, inspector and janitor. Then everything would be lovely if Ratepayer had his own way in everything.

"Ratepayer" certainly has a lot of gall, first wanting the trustees to hire teachers he wants to be hired and then wanting to cut wages. I don't believe in having wage cuts, either for teachers or anyone else, and I am sure Mr. Ratepayer doesn't want any cut himself, much as he is anxious that other folks should have one. See the way he kicks about having to pay 80% assessment on a car, which pretty well shows that he has a new car and is pretty well fixed.

And then, after saying everything possible against our trustees, and saying confidence in them is wanting, we are told how much credit is coming to the Bellevue trustees for the way in which they run their school. Well, I only wish "Ratepayer" lived in Bellevue.

Yes, it looks as if the trouble is that people elect trustees to run the school; and that no matter how hard the trustees work to run the school properly, there are a few people like your correspondent who have nothing better to do than to pick fault with them some way or another, and make mountains out of molehills, and do all they can to discredit very worthy citizens.

The whole letter is ridiculous.

ANOTHER RATEPAYER.

## DRASTIC DRIVING RULES

## FOR NATIONAL PARKS

Regulations prohibiting driving in a national park without a driver's license and providing for suspension of licenses for violation of regulations have been passed by order-in-council, according to the Canada Gazette. The new order provides that "no person shall drive a motor vehicle on a highway in a national park unless he is in possession of a driver's or chauffeur's license in good standing which he has secured from the province or state in which he is domiciled, or a chauffeur's license which he has received from a park superintendent."

"The convicting magistrate or justice of the peace may cancel or suspend the same for whatever period he considers advisable so far as same may be applicable to a national park, when the holder of said license has been convicted of violating any of the park regulations governing the use of motor vehicles or travelling on roads, streets and bridges."

You Are  
A Very Disobedient  
Person

DO YOU protest, and say that you're NOT a very disobedient person? Be patient, for a moment, and we shall see.

Look at the advertisements which you see in this newspaper, and other newspapers. Most of them bid you do something—something which, if done, would be advantageous to you, as well as being profitable to the advertiser. But do you always obey these advertisements? You do NOT! And what is your excuse?

Take your teeth, by way of example. Are you doing what you can to prevent or delay decay or loss? If you are like most persons, you are NOT. Yet you are being urged by advertisements to use regularly a product which, if used regularly, will keep your mouth and teeth in really good health condition; and would enable you to keep your teeth sound, and keep away toothache.

It isn't the price of the product which keeps you from using it—it's just plain inertia and procrastination.

Then there's an electric or other kind of washer—this by way of example—able to do a p. r. h. and on the instalment plan. The advertisements bid you buy it, and give you good reasons why you should use this labor-saving, life-prolonging mechanism.

Has every man and every woman known to you obeyed the commands of the advertisements of this washer? They have NOT. And their resistance can not be put down to DISBELIEF. The explanation is: Most of us are shameless procrastinators—putting off, putting off, putting off all the time.

WHEN YOU read advertisements, see in them the untiring effort of manufacturers and institutions to cause you to do right things.

Take the life insurance companies, by way of example: Their advertisements urge all of us to insure our lives. Yet how stubborn most of us are! We resist the biddings of the advertisements and the canvasses of the salesmen of life insurance. We defer doing the obviously right thing, often for years!

SO WHEN you see and read advertisements, and when you feel inclined to say, "What a shocking lot of money is spent by advertisers!", reflect on this idea: It is the stubborn disobedience of men and women that is to be condemned.

We should be grateful to those advertisers who pursue us all our life, bidding us do things, which if done, would be advantageous to us.

This advertisement is sponsored by the Canadian Weekly Newspapers Association.

## District News

From Our Own Correspondents

### COWLEY HAPPENINGS

On Wednesday evening, the River girls lost to the Cowley girls in a game of softball, played at Cowley, with a score of 16-14.

A garden social was held at the home of Mr. and Mrs. C. J. Bundy on Friday afternoon, under auspices of the Ladies' Aid of the United church, when on opening the gate of the garden, a pleasing sight was in store for the guests of daintily laid tables placed in shady nooks, midst a garden gay with bright blossoms everywhere the eye might rove, with humming birds flitting about as they gathered nectar from the flowers. The ladies did the serving of the tea, while a confectionery booth, which proved to be very popular, was in charge of the girls. After expenses were paid, the neat sum of fifteen dollars was added to the fund.

The girls who were in camp by the North Fork river, near the A. J. Snyder home, returned to town on Thursday evening with a tan on their like natives, but reporting a most exciting and refreshing outing. While at camp, they went on hikes, treasure hunts and nature trips, besides swimming, etc. Prizes were given for building castles in the sand, for observation of nature, etc., at which Barbara Bundy, Edith Murphy, Marion Morrison, Clare Bundy and Beth and Margaret Murray won prizes. Mrs. Bundy, who was their very capable leader, enjoyed the trip equally as well as did the girls. A paper, which was prepared by Clare Bundy, Edith Murphy and Marion Morrison, on the events of camp life, was read on the eve before breaking camp, which was both interesting and amusing.

Mrs. John Kemmis, of Calgary, is paying a visit to Cecil Elton and family.

Clifford Crawford, of Chicago, accompanied by his brother Arthur, of Black Diamond, are on a camping and fishing holiday trip in the Gap. These boys will be remembered by many people, as they lived here for several years.

Miss Ruby Rhodes, of Bellevue,

### Grandest On Earth

**Declares Mrs. Baker**  
Halifax, N. S.—"Sargon is the grandest medicine on earth," recently declared Mrs. Aileen Baker, 10 Matland St. "I was so weak, sick and rundown for two years that all I felt like doing was to sit down and rest. I was badly constipated, and had one headache after another. After taking Sargon and Sargon Pills every ailment I had is gone. I have so much strength and energy I can work around the house all day without feeling overdone."

Sale at BLAIRMORE PHARMACY.

### Dr. J. L. CHAPPELLE

—CHIROPRACTOR—

McLaren Block, Blaimore, Alta.  
Hours: 10 to 12, 2 to 5, 7 to 9  
House Calls in Neighboring Towns at Reasonable Rates.

—14 Years Practical Experience—  
Restoration Assured  
in Cases of Chronic Appendicitis

### DENTISTRY

**R. K. Lillie, D.D.S., L.D.S.**  
Graduate A. U. D. S., Chicago

**HOURS:**  
Coleman—Morning 9 to 12  
Blaimore—Afternoon 1 to 6  
Evenings by Appointment

**PHONES:**

Both Offices 3322—Residence 3323

### LODGE DIRECTORY

**Blaimore Lodge No. 68, I.O.O.F.**

Meets First and Third Tuesdays at 8 p.m. in the Oddfellows' Hall. Officers for the ensuing term: A. Tiberg, N.G.; A. Decoux, V.G.; J. Patterson, Recording Secretary.

### Livingstone Lodge No. 22, KNIGHTS OF PYTHIAS

Meets in the Castle Hall on the Second and Fourth Fridays of the month at 8 p.m. Visitors are always welcome. Officers: C.C. Thos. Gale; K. of R. & S. B. Sennier.

### BLAIRMORE LODGE NO. 15, B. P. O. ELKS

Meets Second and Fourth Tuesdays at 8 p.m. in the Elks' Hall. Visitors made welcome. H. O. Westrup, Exalted Ruler; J. R. McLeod, Secretary.

has joined Miss Irene Wells on a holiday visit with Mrs. Robert Littleton. Mr. and Mrs. Archie Swart, journeyed to Lethbridge for a holiday visit with relatives and friends. Mr. Swart has returned, but Mrs. Swart will stay for several days.

Mrs. Fortier and son Alfred, of Pincher Creek, were visitors here on Tuesday with H. C. Morrison and family.

Mr. and Mrs. Anderson, of Lethbridge, are spending a two week holiday with George Cleland at his ranch in the Heath Creek district.

Miss Muriel Lancaster, of Brockle, has been engaged to teach the Olin Creek school for the coming term.

Miss Phyllis Porter has been re-engaged as teacher of the Tanner school.

### HILLCREST HAPPENINGS

Miss Ruth Moyle, of Didsbury, is visiting at the home of Mr. and Mrs. Harry Stobbs.

Mr. and Mrs. F. J. Smith, accompanied by Mr. and Mrs. C. Smith, motored to Calgary by way of the Banff-Windermere trail.

Mr. and Mrs. S. Marshall and son James left for Calgary on Saturday, where they will spend their vacation. J. Calderwood left for Turner Valley, where he will stay with his mother.

A large crowd turned out on Saturday evening to witness the football game between Hillcrest and Michel. The score was Hillcrest 5, Michel 1. Mr. and Mrs. R. Thornton and family left for Seattle on Sunday morning, where they will spend their vacation.

The Hillcrest Boy Scouts, with Scoutmaster A. Marks, returned home on Wednesday. A very successful and happy time was had by all.

R. Christon sustained a severe shaking up in an accident in the mine, which necessitated his being confined to the hospital for a few days.

Mrs. Dix, of Calgary, is a visitor at the home of Mrs. P. Willett.

Miss Audrey Martin, accompanied by Miss Mary Warriner, motored to Calgary on Saturday.

Margaret and Marion Thornton are visitors with the Stevensons at North Fork.

The visiting Blaimore softball team on Monday was defeated by the locals to the tune of 5-4.

Mr. and Mrs. R. Price, of Calgary were visitors here over the week end.

Mrs. Adams and son James are visiting at the home of Mr. G. Emery.

Lawrence Fisher returned home from the hospital last week end.

John Ironmonger, eldest son of Mr. and Mrs. J. Ironmonger, of Hillcrest, was married at Coleman on Monday to Miss Grace Patterson.

Mr. and Mrs. Philip McNeill and children are spending their holidays camping on the North Fork.

The Hillcrest football team visited Coal Creek on Sunday, where they met defeat by two goals to one.

### WHAT'S IN YOUR HEART

A mouse that dwelt near the abode of a great magician was kept in such constant distress by its fear of a cat, that the magician taking pity on it turned it into a cat itself. Immediately it began to suffer from its fear of a dog, so the magician turned it into a dog. Then it began to suffer from fear of a tiger. The magician therefore turned it into a tiger. Then it began to suffer from fear of hunters, and the magician said in disgust, "Be a mouse again, it is impossible to help you by giving you the body of a noble animal."

The thing that's in your heart—whether it be courage or fear, love or hate, biggishness or nobility, is going to manifest itself in your life. You can't for long camouflage the real you.—Ex.

Presentations of Flags, etc., to Girl Guides and Boy Scouts at Blaimore, May 24th, 1932

### BELLEVUE HAPPENINGS

The first Bellevue troop of Boy Scouts returned home on Wednesday evening from the district camp, held at McGillivray Creek from the 18th to 27th. They all reported a good time. While in camp, the boys won the camp registration certificate for having the neatest and best arranged camp. The troop was under the leadership of Scoutmaster Radford and assistant Scoutmasters Emerson and Owen.

Mr. and Mrs. George Chiarovano and Georgina left on Sunday morning for Faust, Alberta, for a short holiday.

Mr. and Mrs. Cranston and Juanita left on Sunday morning for Edmonton, on a three weeks' vacation.

Mr. and Mrs. J. Radford, Jessie, Fred and James, returned home on Sunday, after a week's holiday in Banff and Calgary.

Misses Ruby Cousins, Kath and Eda Marcolin are spending the week at Waterton Lakes, guests of the Bellevue Lodge.

Joe Foxo dropped dead from a heart attack near the Burns gravel pit, while walking out to a farm, where he had secured work.

Ken McDonald, Sam Radford and Joe Morris are spending a few days at Waterton Lakes.

Mr. and Mrs. H. McLean accompanied by Mrs. McRae, of Macleod, returned home on Sunday from a short holiday spent at the coast.

Gordon May, of Medicine Hat, is visiting his aunt, Mrs. D. S. Hutton, for a few days.

Mr. and Mrs. A. Hallworth were visitors in Medicine Hat over the week end.

Mr. and Mrs. H. Meade spent the week end at Waterton.

Mrs. F. Padgett and children are camping at Lee Lake for a period of two weeks.

Rev. John Wood occupied the pulpit at the Pincher Creek United church on Sunday last.

Nurse Matkin is visiting at Waterton.

Rev. W. Whitmore, of Pincher Creek, took charge of the morning service at the United church here on Sunday last.

Miss Peggy Cole is enjoying a camping holiday at Lee Lake.

Mr. and Mrs. George Clayton and son are spending a few days in town, the guests of his father and sisters, T. Clayton, Marjory and Ethel.

Norman Stewart returned home from Edmonton during the week.

Mr. Thompson returned from Calgary on Saturday.

Mrs. F. Beddington and children have returned to Coleman from Saunders. After an absence of quite a number of years, they have decided to again take up residence at Coleman. Mr. Beddington will remain at Saunders for a while yet.

### 20,000 FAMILIES

#### GROW OWN FOOD

GARY, Ind., July 31.—Industrial northern Indiana, its steel plant furnaces, dark part of the time, has turned to the hoe for employment and food.

A survey indicated today that 20,000 families in the Calumet district have adopted the "Indiana plan" of relief gardening. Swamp lands and other plots, idle for years, now are productive in a "back to the land" movement for food.

Business, relief agencies and the University of Indiana co-operated in this move to stock larders of the unemployed. The result is 43,000 gardens under cultivation in 45 communities.

"Indiana relief laws" require those receiving aid to contribute service, making a "no work—no food" policy possible.

But once the "Indiana plan" was underway, legal compulsion was unnecessary.

Business and industry joined in furnishing land and usually bore the expense of preparing the ground for seeding. Seeds and equipment were donated by a responsive citizenry. Penal institutions furnished free to-temo plants grown in their greenhouses for transplanting. County agricultural agents tested soil and tendered expert supervision.

Idle men found employment in the gardens and worked with a will. In some, financed entirely by industry, the gardeners receive cash or credit toward necessities; in others, their work brings the right to additional supplies—relief earned by honest employment, not charity.

The crops, harvested and canned, go back through relief agencies to the gardeners, promising a food supply for the winter, as well as fresh stuff during the summer.

Schools, churches and even fire and police departments furnish rooms tentatively turned into canneries.

H. E. Young, horticultural expert from Purdue university, declared there's "nothing like this garden movement in the nation."

He points with pride at disappearing weed patches, replaced by flourishing gardens tilled by men and women, many gaining health as well as food.

"I'm still mystified," he said, "how many of these people, untrained in gardening, grow such crops."

Cranbrook Rod and Gun Club will erect a fish hatchery at a cost of \$3,000, with capacity of five million fry.

The Toronto Mail and Empire states that a public loan of from \$100,000,000 to \$200,000,000 will be floated by the Bennett government this fall for unemployment relief and for the 1932 deficit of the C.N.R.

## In One Direction for over 60 years

1869

The record of Canada is like the course of a mighty river—interrupted at times by twists and turns of difficulty, but making across the map of the last 60 years a line of progress so strong and sure that its direction is unmistakable.

1932

The Royal Bank of Canada is typical of this progress. Starting as a small local bank in Halifax, it has moved steadily forward through booms and depressions since 1869. With 881 branch offices, it is today one of the great banking institutions of the world.

## The Royal Bank of Canada

CAPITAL AND RESERVES \$74,155,000

TOTAL ASSETS OVER \$750,000,000

### PROTECTION ALONG

#### HUDSON BAY ROUTE

When the first Atlantic ships head into Hudson Straits on their way to Churchill to load grain this month, they will be constantly protected by a series of radio stations located at strategic points throughout the Far North. The ships will first come in contact with the radio station at Resolution Island, near the eastern entrance of the straits. Then there is Cape Hope Advance, about midway through the strait. Farther on is Nottingham Island base, at the west entrance to the channel. These three stations, plus a fourth at Churchill, are known as direction finding stations. This means that the captains of vessels can communicate with the several stations, during fog, for instance, and his position may be plotted on charts. The station in Churchill keeps in communication with the Ocean Eagle, government trawler, while surveying ice conditions in the bay at present. There is also a radio station at Chesterfield Inlet, about 250 miles north of here; but it is not equipped with the direction finding apparatus. The four above mentioned, however, are said to be sufficient for the safe guidance of steamers. Chesterfield base is equipped with the phone and key systems. In addition to working with vessels at sea, the Churchill station has a short wave operating directly with Ottawa. Weather reports

of a comprehensive nature, dealing with temperatures, rain, hail, sleet and sunshine, are transmitted to the observatory in Toronto daily. The station also handles commercial traffic from the above named stations as well as the Copennense. This service is in conjunction with the Canadian National Telegraphs. The Churchill station works on 650 metres. The masts are 150 feet in height.

### HOW TO ARRIVE

When Socrates was once asked how to get to Olympus he replied, "By doing all your walking in that direction." Men who have accomplished anything worth while in the world have followed the advice of this ancient Greek philosopher, either consciously or unconsciously. David Livingstone in the African wilderness did all his walking in the direction of opening up that vast continent to trade and to the gospel of Christ. He could not be lured into a byway, but kept steadily on the track which he laid down for himself. Let us determine to take the way of the upward calling and keep walking in that direction. When an invitation comes to forsake that way, we can afford to say, "No." There are glorious rewards at the end of the road.

The average person of today with brains not properly functioning boasts of having lots of guts.

## EXPERIENCE COUNTS

DO NOT BUY A NEW CAR UNTIL YOU HAVE TRIED "FLOATING POWER"

We have just completed a wonderful two-day trip in a Chrysler Six with "FLOATING POWER" and we have no hesitation in saying it was the most comfortable trip in our automobile experience. Transacting business in Elko, Canal Flats, Banff, Calgary, High River and Lethbridge, partaking of all the regular meals and sleep, we were still able to complete this circuit in two days without effort; for a pleasant auto trip, easy, comfortable and thrilling, take our advice and try "FLOATING POWER" before making your final decision.

Finest quality for 40 years has built the largest sales in North America.

## Safe Cars And Reckless Drivers

Between six and seven o'clock on Tuesday morning is the safest hour in the week to ride in an automobile. The most dangerous hour is between five and six o'clock on Sunday afternoon. Automobile accidents happen most frequently in broad daylight, on clear days, when roads are dry. If the driver of the car is between 20 and 30 years old, the chances of an accident taking place are 81 per cent. greater than if he is between 40 and 50.

These are some surprising and little-known facts about automobile accidents brought out by an analysis recently completed by United States insurance statisticians. They relate, of course, to that country, but inasmuch as conditions in Canada and the United States are so similar in so many respects it is possible that we would not be far astray if, in the absence of detailed information relating to Canada, these figures were applied to this Dominion as well.

What are the causes behind the rapidly increasing hazards of motoring? In at least nine out of ten automobile accidents, the cause can be traced directly to an error made either by a driver or a pedestrian. Only once in 20 times is the machine definitely at fault. The commonest mistakes made by a driver, leading to a fatality, are driving off the roadway, exceeding the speed limit for the time and place, and going ahead without having the right of way. Other important factors in accidents caused by drivers are: Reckless driving, driving on the wrong side of the road, skidding, cutting in, passing on a curve or hill, and failing to signal properly. Left turns are far more dangerous than right turns.

The "weaving driver," the "speeder," and the "road hog" are the three types of motorists who cause most highway accidents. Among pedestrians, those who cross the street in the middle of the block, walk in the direction of traffic on country roads, or step out into the street from behind parked cars are responsible for a majority of accidents in which those on foot are struck by passing autos.

In only 56,330 cases out of 1,281,400 accidents studied, were the crashes due to mechanical failure. When the cars were at fault, defective brakes led the list as a cause. In the order named, other defects contributed to the accident toll: Lack of chains on slippery roads, blowouts and punctures, one or both headlights out, defective steering gear, glowing headlights, tailights out or obstructed.

If you ask most people under what road conditions a majority of auto accidents occur, you will probably be told, "icy roads" or "wet streets." As a matter of fact, the insurance company experts found that only three per cent. of the 1931 accidents occurred on icy surfaces and less than 10 per cent. on wet surfaces. In 81 per cent. of all mishaps, the roads were dry. Also, 85 out of every 100 accidents resulting in deaths occurred under clear weather conditions. And most accidents happened in daylight.

When a motorist starts on a ride, if he meets with an accident, the chances that it will occur before he gets out of the driveway are one to 200. The chances of its occurring on a railroad crossing are slightly greater; of its happening on a bridge, one to 100; of its taking place on a curve, one to 25; or of a state highway, one to five, and at a street crossing, one to two, and a half.

What kind of drivers are most frequently in accidents: Young or old, experienced or inexperienced? Figures compiled in the survey upset some popular beliefs. For instance, they show that more than 91 per cent. of all drivers involved in accidents which resulted in fatalities or injuries were experienced motorists with a year or more practice at the wheel. Over-confidence is given as a major reason for the high percentage of experienced motorists who figured in mishaps.

So far as age is concerned, the most hazardous time for automobile driving is under 20. The accident record of drivers under this age, last year, was 39 per cent. worse than the average. The record of those between 25 and 30 was 29 per cent. worse than the average; between 30 and 40, three per cent. better than the average; between 40 and 50, 29 per cent. better; and beyond 50, 36 per cent. better.

While it is still a disputed point whether the increasing average speed of automobiles and the lifting of the speed limit on country roads is causing more accidents, the investigation shows undeniably that the stepping up of speeds has increased the seriousness of accidents when they have occurred. Incidentally too, researchers just made by the Chicago Motor Club reveal that travelling a mile a minute is three times as expensive as motoring 45 miles an hour. The extra 15 miles an hour troubles the upkeep costs of the car.

With such facts in mind as have been established by this survey, motor car drivers should govern themselves accordingly, and by so doing they may save themselves much sorrow. First, check over your car for defects which it has been shown are the chief cause of accidents resulting from mechanical weaknesses. Then note the principal causes of accidents due to the driver himself, where and when they are most likely to take place, and the steps that should be taken to prevent them taking place. If an accident takes place, the responsibility is, first and foremost, your own; secondly, the driver of the other car; thirdly, the condition of your own car; fourthly, the condition of the other fellow's car. Therefore, it is up to you to prevent an accident.

### Pertinent Questions

A little girl saying her hymn, "There is a green hill far away," was thrilled to hear her mother knew the lady who wrote it. Then she repeated her psalm, and added gravely: "And did you know the world, too?" It was as well also that the child who frequently repeated the hymn in which occurs the line:

"And Satan trembles when he sees the weakest saint upon his knees," should at last have been prompted to ask:

"But what was the little saint doing upon Satan's knees?"

### Answer Was Unexpected

Little Anna asked her father why he didn't have hair on top of his head. He answered: "For the same reason that grass won't grow on a busy street. You know why now, don't you?"

"Sure," she replied. "It can't get up through concrete."

A twice-daily aeroplane service is being operated between Shanghai and Nanking, China.

Fine sandpaper or a wire brush will restore the finish of suede shoes.

## Troubled With Her Children Having Summer Complaint

Mrs. L. E. Montgomery, Ave. E. South, Saskatoon, Sask. writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every summer they were subject to it."

"I have found Dr. Fowler's Extract of Wild Strawberry to be the most effective remedy and keep it always handy and give it immediately on the first sign of trouble."

"Thanks to Dr. Fowler's I no longer dread the Summer months."

### Appointed Acting President For C.N.R.

Printer's Ink Used To Propel Locomotive Across Atlantic

The liner "Scythia" came across the Atlantic, using printer's ink for propulsion. One of her six boilers was fired with a mixture of powdered coal and petroleum—60 per cent. oil and 40 per cent. coal. The other boilers were fired with oil.

Driving the liner with ink is, of course, an experiment. If it is as successful as preliminary trials promise, it will open an important new market for British coal.

Bunker oil in British seaports costs 40 shillings a ton; coal only 12 shillings. The coal is easily ground to such a fineness that the particles suspended in the oil, forming a thick jelly-like mass which is an even better fuel than the oil alone.

This is only a single item in the remarkable list which British brains are making to meet the new economic conditions of the post-war world.

The right light is not in the realm of theory or philosophy or the unrealities of politics, but right where it always has been—the application of intelligence to actual problems. It is a light which requires patience and tenacity, and it gets less attention than it deserves in comparison with some of the side-shows.

The "Scythia's" new application for printer's ink shows the dynamic qualities of that substance in a startling new light. The stuff has been regarded since the time of Caxton, as more dangerous than gunpowder. The British engineers who have used this mighty force and turned it to the humdrum task of twirling a steam-engine's turbines is a modern Ajax.—The Winnipeg Tribune.

Born in Bedford, Que., sixty years ago, S. J. Hungerford entered railroad as an apprentice with the Southeastern Railroad, later part of the C.P.R., at Farnham, Que.

Completing his apprenticeship he worked as a machinist at many points in Quebec, Ontario, and Vermont, and in 1894 was appointed Chiefman at Windsor Street Station, Montreal. From 1897 Mr. Hungerford worked as assistant foreman, locomotive foreman and general foreman at Farnham, Megantic and McAdams Junctions, and in 1901 was transferred to Cranbrook, B.C., as locomotive foreman with the Canadian Pacific. From Cranbrook, he moved in 1903 to Calgary as master mechanic of the Canadian Pacific's western division, and in the following year was made superintendent of the locomotive shop at Winnipeg, becoming in 1908 superintendent of shops.

In 1910, Mr. Hungerford joined the Canadian Northern Railway, as superintendent of rolling stock with headquarters at Winnipeg and in 1916 he moved to Toronto in the same position. In 1917 Mr. Hungerford became general manager of the Eastern Lines, Canadian Northern Railway, and in the following year was named Assistant Vice-President, Operating, Maintenance and Construction Departments of the Canadian National Railways with headquarters at Toronto. With the taking over of the Grand Trunk Pacific Lines, Mr. Hungerford, in October, 1920, became Vice-President in charge of Operating and Maintenance Departments of the Canadian National and Grand Trunk Pacific Railways and two years later, in October, 1922, he was made Vice-President and General Manager of these lines, with headquarters at Toronto, in which position he continued until his appointment, in February, 1923, as Vice-President in charge of Operating, Maintenance and Construction of the Canadian National System, with headquarters at Montreal.

Railroading conditions have altered vastly since the days when S. J. Hungerford commenced service as an apprentice at Farnham in 1886. Then, woodburning locomotives were still in use; cars were coupled by the old "links and pins" and airbrakes were unknown. Hours of work were long and pay was small, and apprentice training systems were not brought to the stage where they are today when every effort is made to educate and encourage the boys to learn while they earn and fit themselves for better jobs.

Locomotives of 1886 were pygmies as compared with the 6100, 4100 and the 5700 classes of engines used today, on the Canadian National system, and the trains they hauled: mere toys compared with the huge freight loads and all-steel passenger trains which are now operated. Practices of handling locomotives in shops and on the road have altered with the growth in size of locomotives which have had to be "shopped" and many of the improvements in shop practices in Canada have developed under the watchful eye of S. J. Hungerford, who has always held the admiration of those who worked with him because he knew every phase of the work so thoroughly himself.

### Proves Its Force

Printer's Ink Used To Propel Locomotive Across Atlantic

The liner "Scythia" came across the Atlantic, using printer's ink for propulsion. One of her six boilers was fired with a mixture of powdered coal and petroleum—60 per cent. oil and 40 per cent. coal. The other boilers were fired with oil.

Locomotives of 1886 were pygmies as compared with the 6100, 4100 and the 5700 classes of engines used today, on the Canadian National system, and the trains they hauled: mere toys compared with the huge freight loads and all-steel passenger trains which are now operated. Practices of handling locomotives in shops and on the road have altered with the growth in size of locomotives which have had to be "shopped" and many of the improvements in shop practices in Canada have developed under the watchful eye of S. J. Hungerford, who has always held the admiration of those who worked with him because he knew every phase of the work so thoroughly himself.

### Unusual Guest Of Honor

Skeleton Made London, University Dinner Guest of Honor

A man who died a century ago was the guest of honor at a dinner given at University College, London, England.

He was Jeremy Bentham, great philosopher and lawyer, who was one of the founders of the college.

He wore the same clothes as he did a century ago, and looked on with tacit approval at the 20 distinguished professors, economists, philosophers, and lawyers who toasted him.

The eerie dinner was given to celebrate the hundredth anniversary of his death.

The eerie dinner was given to celebrate the hundredth anniversary of his death. In his will he had expressed the hope that his disciples gathered together to discuss his great work, would have his skeleton in their midst.

For years the skeleton had sat on a chair in a glass case, dressed in his own clothes, with the skull at his feet, and a wax effigy of his face in its proper place.

The distinguished gathering drank to his health, and then proceeded to discuss his great ideas which have become a part of our legal and moral standards.

It was Jeremy Bentham who said, "The greatest happiness for the greatest numbers."

## BRITAIN'S AIMS ARE OUTLINED AT CONFERENCE

Ottawa, Ont.—The Empire Conference moves forward to its climax. The statement issued by Rt. Hon. Stanley Baldwin, leader of the British delegation—while ostensibly a review of tariff advantages enjoyed by Empire goods in the British market—makes clear that the British delegation aims to secure:

(1) Reductions in the rates of duty now imposed by the Dominions on British goods.

(2) Curtailment of the power of customs authorities to impose arbitrary valuations for duty purposes. Although not stated as such, they are Dominion concessions Great Britain evidently has in mind, if she is to maintain or extend the preferences she now grants to Empire goods under her tariff system.

Around British headquarters there is keen conjecture how far the Dominions will be prepared to advance along these lines. The Dominions, on their part, are no less anxious to know how far Great Britain will be ready to reciprocate with preferences on natural products, what she will be prepared to do in regard to Russian dumping. So far, British headquarters have made no offer to tariff preferences on wheat and meat.

### War Debts Revision

Senator Thinks It Might Be In The Interests Of The United States

Washington.—The view that war debts revision might be to the interest of this country was expressed recently by Senator Carter Glass, Democrat, Virginia, in discussing the proposal of Senator W. E. Borah, Republican, Idaho, for a world conference to consider debts and other post-war problems.

Talking informally with newspapermen about the Borah proposal, the former secretary of the treasury said he had stated "explicitly" in the senate a few weeks ago that he "disented from the view that there was to be no readjustment of foreign indebtedness."

"I pointed out," Glass said, "that aside from sentimental aspects of the question it might come to our own economic interests to readjust the indebtedness."

### Discuss Money Rates

Instability Of Exchange Occupies Attention Of Imperial Conference

Ottawa, Ont.—Representatives of the United Kingdom, the Dominions and India discussed the decline in commodity prices and the instability of exchange rates. It was the first business meeting of the Imperial Conference Committee on monetary and financial questions.

"The discussions will continue," so ran the brief official announcement following the meeting. It had already been intimated that, after an exchange of views, a sub-committee will be constituted to explore the details of currency, exchange and price declines.

### Expect Treaty With Africa

Ottawa, Ont.—Negotiations between Canada and South Africa since the opening of the Imperial Economic Conference have been so successful that a trade agreement between them is expected shortly. It was made clear that this treaty will not conflict with the broader negotiations of the conference.

### New Stamp For Manchuria

Harbin, Manchuria.—New Manchoukuo postage stamps have appeared following the suspension of Chinese postal service throughout Manchuria. Japan will handle all Chinese and foreign mail bound for the new Pu-Yi Government. This is taken as the most recognition of the Pu-Yi Government by Japan.

### Must Stay Away

Belfast, Ireland.—Nationalist members of the Northern Ireland party received a resolution regarded as equivalent to a command from the "Irish Republic Army" calling upon them to attend no more sessions of the Ulster House of Commons.

### Adhere To Agreement

London, Eng.—Spain notified the British Government recently that it will adhere to the European consultative pact, first negotiated by France and Great Britain.

W. N. H. 1933

## Gorgulov Found Guilty

Assassinator Of President Paul Doumer Must Pay Penalty

Paris, France.—Dr. Paul Gorgulov was found guilty of assassinating President Paul Doumer, of France, at the close of his trial.

Witnesses, telling of Gorgulov's life, said he had to struggle against frequent hysterical outbursts. Gorgulov protested violently when one witness said that while not mentally deranged he could not be called entirely normal.

Ivan Lazareff, a Russian laborer, declared on the stand that Gorgulov had been a member of the old Russian chetka, or secret police, and testified that Gorgulov and other members of the chetka captured him on one occasion and tortured him, twisting his arms and beating him, burning his arms and bending back his fingers until they broke.

Two of the defence attorneys said Gorgulov unquestionably was insane.

## Outlines Air Mail Service

Iceland Route Offers Advantages Says Captain Von Gronau

Montreal, Que.—An air mail service from Europe to the Pacific Coast was briefly outlined by Captain Wolfgang von Gronau in an interview with the Canadian Press.

"The steamships are so fast now we can offer little competition between Europe and New York," Captain von Gronau said. "But a service direct from Europe via Iceland, Greenland and across the continent to the Pacific Ocean with intermediate stops should offer many advantages and a great saving of time. It is to study such a project that we have made this present flight."

He said he had been in touch with the Royal Canadian Air Force for information about flying conditions and routes in western Canada. The captain was glad to hear his gasoline had arrived safely at Prince Rupert, B.C.

## Five River Drivers Drown

Boat Capsized When It Was Sucked Into Rapids

Deux Rivières, Ont.—Four of a party of nine river drivers, employed at sweeping on the Ottawa River for the Upper Ottawa Improvement Company, perished when their boat was sucked into the eddy of the True Rapids and capsized as they were endeavoring to run the turbulent part of the river. Another member of the party is not accounted for and it is feared that he met the same fate. Three managed to cling to the upturned boat and reached the shore safely while another swam to shore.

## Canadian Cattle Sold

Selected Cargo From Saskatchewan University Bought In England

Regina, Sask.—A shipment of cattle from the University of Saskatchewan to England has been sold, according to a cable received by the Department of Agriculture from Dean A. M. Shaw, who is in England.

Particulars were not available as to the price in the cable, said H. Auld, Deputy Minister of Agriculture. The shipment from the university was a selected cargo of steers.

## Book Of Remembrance

Ottawa, Ont.—Some 68,000 names will be inscribed in the Book of Remembrance which will be placed within the casket of the altar in the memorial chamber here—names of Canadians who gave their lives in the Great War. The task of executing the volume has been given to James Purvis, heraldic artist, London, Ont.

## Use Wooden Money

Klagenfurt, Austria.—They're taking wooden money in the province of Carinthia from the farmers who have not enough coin of the realm to pay their taxes. The government announced that those who had no cash could pay in pine or beechwood at approximately the market price.

## Cholera Epidemic In China

Manila.—Reports from Interior China indicate thousands are dying daily in virtually every province from a cholera epidemic, which extends into Manchuria and Indo-China. At least 20 out of every 100 persons contracting the disease are dying, it was reported.

## Try Cattle Smuggling

Belfast, Northern Ireland.—Attempts to smuggle cattle from the Irish Free State into Northern Ireland began as a result of the tariffs. About 50 head were seized by the Ulster constabulary at Forkhill, South Armagh. The drover abandoned the animals and escaped over the border.

## Estimating the Crop

Grain Experts Talk Of 430,000,000 Yield This Season

Winnipeg, Man.—Grain experts who have just returned from a crop inspection tour of western Canada, said that conditions at July 20 indicated a prairie wheat crop estimated at 430,000,000 bushels.

Extreme heat during the past 10 days and lack of rain in parts of central and southern Saskatchewan may cause a slight revision of these figures, they stated, but on the whole crop conditions were reported to be fairly good.

Slight deterioration has taken place in southern Saskatchewan in areas which suffered from drought last year, and rainfall is needed if the standard of the crop is to be maintained, they said. Conditions in Alberta, northern Saskatchewan and Manitoba were found to be very good.

## TRADE TREATY WITH S. AFRICA EXPECTED SOON

Ottawa, Ont.—Negotiations between Canada and South Africa since the opening of the Imperial Economic Conference have been so successful that a trade agreement between them is expected in two weeks. It was made clear that this treaty will not conflict with the broader negotiations of the conference.

Experts from the Department of Trade and Commerce, which is under Hon. H. H. Stevens, are meeting with the advisers of the South African delegation and smoothing out the difficulties. They are optimistic that an agreement can be arrived at which will greatly increase the trade between the two countries.

Canada has been seeking for some time to develop trade with South Africa, and this year is buying some 50,000 tons of sugar from that country. There is also hope of increasing the importations of pineapples, wool, oranges, Indian corn, and sisal, a type of hemp cordage.

The balance of trade between the two countries has been considerably in favor of Canada. In the last calendar year she sold South Africa goods to the value of \$2,202,200, and bought from her to the value of \$4,416,400.

In the fiscal year ending March 31, 1931, Canada sold South Africa: wheat, \$2,198,800; rubber tires, \$1,027,400; newspaper, \$1,004,500; automobiles, \$2,023,600; farm machinery, \$630,400; electrical goods, \$400,600; flour, \$275,400; binder twine, \$78,400; wood products, \$300,000; apples, \$49,300; rubber boots and shoes, \$144,000; canned fish, \$121,000; wrapping paper, \$400,000. There was also an extensive list of miscellaneous goods in which it is hoped to increase the sales. Lumber is looked upon as one of the products in which there is considerable possibility.

At the present time South Africa enjoys the British preferential tariff in goods coming into Canada.

## QUEBEC'S OBSERVER

C. G. Power, K.C., Member of Parliament for Quebec South, who will be official observer for the Province of Quebec at the Imperial Economic Conference.

## Wide-Spread Plot

Unearth Plan To Wreck Banks In United States

Chicago.—Melvin A. Traylor, president of the First National Bank of Chicago, said he had reports from practically every large city in the United States concerning a plot to wreck banks by circulating unfounded rumors against them.

Informed of an investigation at Pontiac, Mich., into such a plot, said to have been directed by a radical group interested in fomenting a social revolution, Traylor said the same tactics had been used in Chicago.

"There is no doubt," Traylor said, "but that runs on Chicago banks were caused by circulation of rumors by radically interested persons. Anonymous telephone calls were used in attempts to cause panic among depositors of even the largest and strongest banks."

"Reports were received in Chicago from many other cities where the same system was used. I am of the belief that the plot against banks was nation-wide."

## Transients Journey East

Calgary Unemployed Leave For Harvest Fields Of Saskatchewan and Manitoba

Calgary, Alberta.—Calgary's transient unemployed situation was relieved somewhat when Royal Canadian Mounted Police permitted a number of the workless wanderers to journey eastward to harvest fields in Manitoba and Saskatchewan.

It was learned, however, the men were still not permitted to journey past Winnipeg. Only those the police felt sure were destined to harvest jobs were allowed to leave Calgary via "the rods."

## Take Wheat As Cash

Toronto, Ont.—The Canadian branch of a British firm of food products exporters announced that it would take wheat for all products sold in western Canada after August 1. Then it will ship the wheat to Great Britain and market it there.

## SPEED KING TRIES HIS

## LUCK WITH THE RIFLE

Flight Lieutenant Stainforth, the famous high speed flight pilot, who captured the world's speed record for seaplanes by travelling at 404 miles an hour, is pictured on his way to compete on the Century Range at Biele. In addition to being an expert pilot, Stainforth is also noted for his shooting and has carried off many Air Force Trophies at the ranges.

## Soviet Restrictions Against Sales Removed

Peasants May Sell Products With Exception Of Grain

Moscow, Russia.—Soviet authorities announce a new important step in the direction of removing official restrictions against sales by Russian peasants of their own products.

Hereafter all peasants living within a distance of about 30 miles of Moscow are freed from contracts which heretofore obligated them to deliver their produce to state co-operative organizations at fixed prices.

An exception was made regarding grain. Grain contracts will remain in operation.

The only reservation is that those peasants who have not joined the collective farms must carry out 50 per cent. of their contracts for potato deliveries.

## May Leave Ottawa Post

Remoted That U.S. Minister To Canada Will Not Leave Of Absence

Ottawa, Ont.—Reports on high authority in the capital are that Hon. Hanford Macdonald will ask early next month for leave of absence from his post as United States Minister to Canada. Col. Macdonald, it is understood, will proceed to the United States for the presidential election, and may resign his post after the election on November 1. His name was put in nomination at the recent Chicago Republican convention as candidate for vice-president.

## BELIEVES WHEAT TARIFF WOULD BENEFIT CANADA

Winnipeg, Man.—It is not entirely true that the grain trade of Canada and western grain growers consider a preferential tariff in favor of Canada what is in the British market would be of no advantage to Canada, according to James R. Murray, general manager of the Alberta Pacific Grain Company Limited, and at one time executive of the United Grain Growers.

In a statement, Mr. Murray said: "It is ridiculous to suggest, as press dispatches from Ottawa during the past few days indicate, that the entire grain trade of Canada and grain growers of the west consider that a preferential tariff in favor of Canadian wheat in the British market would be of no advantage to Canada."

"Confidentially, however, it is a view, may have been submitted to the Dominion Government by the authorized spokesmen of various bodies, but it is absurd to assume there is no contrary opinion among those 'who represent' the official spokesmen made by grain trade spokesmen are not the views of all grain dealers any more than the wheat pools and provincial government express the views of all farmers in the west."

"Almost everyone can agree that a quota system would be cumbersome and useless, but a preferential tariff is a different matter. Personally, I believe the free entry of Canadian wheat into the British market, by far the biggest importing market in the world, with a duty against non-empire wheat, would be a distinct advantage in marketing our Canadian crop and over a period of years would assist in obtaining better prices for our western grain growers."

"Considering the almost prohibitive tariffs against all wheat imported now in effect in all European countries, I believe there is much to be gained and nothing lost by such a preference."

"It seems to me unfortunate, particularly at this time, when wheat growers in western Canada need all the assistance and encouragement they can get, that spokesmen who at best supposedly represent less than half the farmers in the west, should take the position that a preferential tariff on our wheat in the British market is a matter of supreme indifference to them."

"Whatever the views of our western farmers may have been on this matter 15 or 20 years ago, I do not believe they are today indifferent to the advantages that would accrue to them from such a preference."

"I believe that if the Dominion Government can, in exchange for tariff concessions on British manufactures entering the Canadian market, they will accomplish something of great benefit to the whole of Canada and will earn the thanks of the majority of farmers and business men in western Canada."

## BAN ON CANADIAN LIVE CATTLE TO BE LIFTED SOON

Ottawa, Ont.—Through the disposition of Great Britain to accept Canadian exports, the prairie provinces have scored another bull-eye in the way of trade concessions.

It was announced officially by the British delegations that all discriminations presently enforced against Canadian cattle are to be withdrawn. This is another conference contribution, made by the British delegates, one which removes disabilities on Canadian cattle exports which have been the source of innumerable protests from the prairies.

At the present time, only Canadian cattle which are incapable of breeding are admitted into Britain. Before shipment they have to pass an examination, must be accompanied on the voyage by a veterinary inspector. Upon landing they have to undergo a period of quarantine.

Canada's chief competitor in the live cattle trade—Ireland—was subjected to no such restrictions. The British delegation notified the Canadian delegation that these obnoxious regulations would be withdrawn, that Canadian live cattle hereafter would be freely admitted into Britain. The date of the change of regulations was not given but presumably it will be at the close of the conference.

## Bankers Battle With Bandits

Frustrate Attempt To Rob Branch Bank In Vancouver

Vancouver, B.C.—A bank manager and a clerk frustrated an attempt to rob a branch of the Royal Bank of Canada here Thursday, July 26, when they opened fire on two bandits instead of complying with the order "Hold up your hands." The bank is situated at Sixteenth Avenue and Oak Street.

The two bandits marched into the bank with drawn revolvers and ordered the manager, G. E. Devereaux, to hold up his hands. Mr. Devereaux and a clerk immediately drew their bank weapons, the former firing six shots and the clerk three at the would-be robbers.

The bandits fled without returning the fire and escaped in a stolen auto. This is the second clash with bandits for Mr. Devereaux who some years ago beat off a bank raid in a similar manner.

## Success Of Conference

Lord Halsbury Says Favorable Results Vital To Empire

Ottawa, Ont.—"The conference is shaping like a success," observed Lord Halsbury, British Secretary for War, interviewed here. "We are all working very hard," he added.

"It is absolutely vital that this Ottawa conference should be a success," Lord Halsbury went on. "If it isn't it may mean a breaking up of the Empire within my lifetime. And of course, if the Empire goes, there is little hope for the world."

"Can Great Britain give the full embargo asked for by Australia and Canada on Soviet wheat lumber, etc.?" Lord Halsbury was asked. "We may not be able to do all that we are asked, but we can certainly do something," Lord Halsbury replied.

## Adopt Western Method

Harbin, Manchuria.—Banditry, kidnapping and looting continues rife throughout the territory. Three Japanese railway officials were kidnapped. The Pu-Yi Government has decided to adopt the electric chair method of executing criminals instead of shooting or decapitation.

## Italy Denies Story

Rome, Italy.—The ministry of marine has issued a second denial of a London story about an Italian "secret navy." The ministry said the report that two cruisers and two torpedo boats had been ordered constructed a year before the order was announced in parliament was false.

## Mystery Shipment Of Gold

London.—A "mystery" shipment of 450,000 in gold left Plymouth for New York recently, and the news caused much surprise on the London bullion market. Bankers, however, believed it to be a private transaction.

## Arbuckle On Screen Again

New York.—Roxcoe C. "Patty" Arbuckle is returning to pictures. Warner Brothers announced it was signing the one-time film comedian for a comedy.

## Prices Away Down on Beef, Veal, Pork and Lamb

**\$1.00** **Cash Specials** **\$1.00**  
FOR THE WEEK END

Smaller than the booklet recently published by us on the timely subject of "What We Know About Women" will be one to be turned out at Ottawa shortly, giving verbatim the conference recently supposed to have ensued between Harvey Murphy, Real estate organizer, and H. H. Richard Bedford Bennett, prime minister of Canada, while the British flag gaily floated overhead.

## TENDERS FOR SCHOOL HOUSE

COWLEY S.D. NO 373

Sealed Tenders will be received by the Board of Trustees of the above school district at the office of the Secretary-Treasurer up to noon, August 10th, 1932, for the erection of a two-roomed stucco school building, after Plan No 63A. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 24 hours, and deposit will then be refunded. A marked cheque for five per cent of the amount of tender must be enclosed with each tender as a guarantee that same is bona fide. No tender will be considered without this cheque attached. The lowest or any tender will not necessarily be accepted.

C. J. BUNDY, Secretary-Treasurer, Cowley, Alberta.

A Oliva has completed the exterior renovation of his building at the corner of Eighth Avenue and Victoria Street, at present occupied by the Blairmore Hardware Co. and various lodges.

In Northern Ireland there are 2,602 Boy Scouts, 618 Rovers, 2,306 Wolf Cubs; and in the Free State, 1,065 Scouts, 303 Rovers, 128 Sea Scouts, 26 Rover Sea Scouts, 553 Wolf Cubs, 256 leaders.

## Local and General Items

Add this up: Painted, powdered, perfumed and pyjamaed.

The wife of Senator Gideon Robertson died at Ottawa on Sunday morning.

Dr. McKay, Dominion Government geologist, and party are now camped near Elk Prairie, west of Natal.

C. H. Erikson and family have returned from a holiday visit with Mr. Erikson's brother at Sylvan Lake.

Uniforms worn by Scouts of the Falkland Islands are procured from Canadian Scout headquarters at Ottawa.

Mr. Kraft, of Lethbridge, divisional manager for Safeways Limited, was in town on Tuesday, accompanied by Mrs. Kraft.

A mob of about five hundred men charged the police in a riot at Ottawa on Tuesday, carrying banners, "Fools Starve, Men Fight," etc.

Drumheller school trustees have reduced the maximum salary of public school teachers from \$1400 to \$1200, until times improve.

Mrs. McDonald, wife of Jack McDonald, genial proprietor of the Empire hotel at Coleman, is on a holiday visit to points in Nova Scotia.

"Stroller," in the Cranbrook Tribune, asks: "Who is the young lady in Blairmore who reads letters in church? My, my, that's a bad habit."

Misses Dorothy and Caroline Moore are spending a holiday at Lethbridge, guests of Miss Doris Attwood.

The International Coal & Coke Company, at Coleman, has secured a good order for coke, and a number of ovens were set in operation this week.

Sid Newman, drummer for Gony's Limited in this district, is this week accompanied by Mr. William, head shipper, and Dr. Durik, of Calgary.

Rev. Mr. Howie and family, of Milk River, are holidaying here for three or four weeks. Rev. Howie will fill the United church pulpit while here.

The Crows' Nest Pass Coal Company has decided to erect a coal washing plant at Michel. The contract has been let with the Manitoba Bridge Company.

Rev. George and Mrs. Biddle, formerly of Pincher Creek and now of Calgary, are receiving congratulations upon the arrival of twins, a boy and girl, on July 21st.

With Michel mines so short of coal orders that they have not worked for five successive days, opportunities for the Blairmore and Bellevue striking miners should look anything but bright.

In a Nova Scotia paper a few days ago, the account of a happy marriage ended with this: "The young couple are survived by their parents, ten brothers, four sisters and three small children."

Miss Frances Fabro returned to Kimberley on Monday, after spending a short holiday here with her mother and brothers. She was accompanied back by her brother, Cyrus, and Miss Anna Pozzi.

The arrival of a nine and a half-pound daughter to Mr. and Mrs. "Bob" Bartlett, at Detroit, has just been announced. Bob will be remembered by quite a number in Blairmore, having resided here for a time during 1916 and 1917.

An East Kootenay Power Company crew, from Fernie, in charge of Howard Uphill, is this week moving the high voltage line running through the district south of the track to outside the town. Radio owners in this district will be much benefitted by the change.

Lost confidence is the greatest loss any man can suffer.

Miss Ida Emery has returned from a visit with friends at Cranbrook.

Robert Winstanley, of Michel, has been appointed stipendiary magistrate.

FINGER WAVING AND MARCELLING. Phone 238, Blairmore—Freda Brown.

Dr. H. B. Hoar, dentist, returned Sunday last from a visit to his home in New Brunswick.

THE FALLS MARKET—Fresh Eggs, Butter and Cream. Lundbreck Falls, P.Q., Lundbreck.

Sixty Finns from Western Canada are enroute to Russia, where they will go into government service.

Get your Counter Check Books from The Enterprise office. A stock of blank books on hand or printed to your requirements.

The last Scout census for Wales showed 6,822 Scouts, 153 Sea Scouts, 90 Rovers, 51 Rover Sea Scouts and 5,504 Wolf Cubs.

F. Walters, of Chicago, vice-president of the Chicago and North Western railway, is on a holiday visit at Jasper Park lodge.

J. Caldwell, C. Fulton, G. Lord, C. Johnson, F. Holmes and A. McKay undertook to climb Crows' Nest Mountain on Sunday last.

George Watkins Evans, well known to mining officials in this territory and consulting engineer, of Seattle, recently addressed the Rotary Club at Fernie.

W. H. Chappell left early in the week for Calgary, where he is to consult a specialist. Mr. Chappell's health has been impaired for some considerable time.

Mr. and Mrs. H. Carmichael and daughter, Margaret, and Miss Agnes Kemp, returned from Edmonton on Saturday, where they were visiting with Mr. Carmichael's parents.

The engagement is announced of Anna Maude, youngest daughter of Mrs. E. L. Habor, to Major Ralph C. Jessup, both of Macleod. Major Jessup is proprietor of the Macleod Gazette.

Down on Vancouver Island, men who voluntarily used to use up all their wind to fill the bagpipes are now forced to use the same amount of surplus puffing to blow the insects out of the flower gardens.

The New York Herald Tribune says Sir Henry Thornton, retiring president of the Canadian National Railways, is being considered for the post of commissioner of the Association of Western Railway Executives.

We understand that Frank Bombardier, who is practically an invalid and is receiving special treatment at Edmonton, is not showing signs of improvement. Through friends in this district, who visited him recently, he wished to be remembered to all friends here.

At the regular meeting of the Blairmore Board of School Trustees on Friday evening last, the estimates for the year 1932-33 were considered. In the aggregate, a considerable reduction from last year's is made effective. A number of accounts were passed for payment. Present were: Chairman R. W. H. Pinkney, S. G. Bannan, E. Oakes, J. Angus McDonald and C. J. Tompkins.

We overheard a remark the other day from a man who is drawing down a very liberal pension from the government that the coal company's hand here was being forced to accede to the Red demands. This particular pensioner is being watched, and if he has any particular regard for the good treatment being meted out to him by Canada, he had better bridle his tongue.

## SCOTT'S GROCERY

BLAIRMORE Phone 222 ALBERTA

Thirty-two hundred carloads, or 18,000,000 pounds, of binder twine are the estimated requirements for tying up the wheat crop of Western Canada this year, according to the latest reports. In terms of relativity, this amount of twine is equivalent to 2,045,075 miles, or enough to go around the earth 88 times.

Mrs. Annie Belle Bansemer, former pioneer resident of the Crows' Nest Pass, died suddenly of a heart attack at the home of her daughter, Mrs. John W. Arnold (Kate), 2239 Garnet Street, Regina, Sask., on the 21st of July. She is survived by four daughters, Mrs. Arnold, Mrs. Frances F. MacNeil, Calgary (formerly of Blairmore and Coleman); Mrs. Paul R. Brown (Hulda), Drumheller, and Mrs. J. O. Wilson (Annie), Moose Jaw, Sask., and three sons, Rufus W., of New York City; Henry H., of Boston, Mass., and Harold S., of Aldersdale, Alberta. Also surviving are seven grandchildren and three brothers and five sisters in Nova Scotia. Mrs. Bansemer was nearing her 71st birthday and had never had any serious illness.
